Experience with the Distributed Node Consensus Protocol (DNCP) draft-jin-homenet-dncp-experience-00

#### Abstract

This document reports experience with Distributed Node Consensus Protocol (DNCP). It includes introduction of existed known implementations and simulation results of DNCP.

#### Status of this Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at http://datatracker.ietf.org/drafts/current/.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on December 29, 2015.

#### 1. Introduction

TODO list:

- o brief introduction of dncp
- o purpose of this document
- o outline and content of this document

### 2. Implementations

TODO list, for each known implementations (I think we have only one at this point?)

- o conducted by who?
- o open/close source? if open source, the link?
- o if available, number of lines/foot print
- o if available, operational experience.

## 3. Simulation Setup

3.1. Simulation Environment

dncp + ns3

layer 2 settings

3.2. Performance metric

convergence time ...

convergence ratio...

- 3.3. Chosen toplogies
- 4. Performance Evaluation
- 4.1. Scenario 1: xxx
- 4.2. Scenario 2: xxx

### 5. Conclusion

conclusions
